Building 11 Golf Side Renovation

Building 11 Golf Side Renovation:

Remove all the existing plant material from around building 11 including asparagus ferns, palm sucker, including 1 crape myrtle right of front steps that doesn't fit within landscape

Grade Down soil in front or the steps in front of the building, soil behind the building in and around the steps

Install the following plant material to resemble or to closely match the planting around building 15

144 - (1 Gallon) Liriope

89 - (3 Gallon) Viburnum

St. Augustine Sod - 4 Pallets (**Small portion of sod will go in front or building 12 that was torn up from construction**)

Install - Pine Bark Mini Nuggets - 10 yards at 2" in depth

The Oak Tree directly in front of building 11 will have mulch installed around the tree as there are surface roots in the area where sod can not be installed.
