RE: 700 ocean place
Ponte Vedra Beach FL 32082

IAS will come out and dig up 50ft of 4in pvc from the clean out in front of building 27 unit 876. During the excavation we will need to cut 15ft of asphalt to get to a good section of pvc. (we will fence off 3 parking spots and the area we will be excavating) we will need to remove a bush that is right over top of the sewer line, we cannot guarantee the bush will survive excavation. After the pipe is exposed IAS will remove old section of pipe and replace with 4in pvc sc 40. We will test and ensure everything is working at that time with no issues.

Also asphalt repair is included in the price.

○ **Price: \$4,200.00**

Acceptance of Propose- The above price, specifications and conditions are satisfactory and hereby accepted. IAS is authorized to do the as specified. Payment will be made as outlined above. Customer agrees to pay all charges, including reasonable attorney's fees, plus court costs and interest on accounts which must be turned over to an attorney for collection.
